High Voltage WARNING Frequency converters are connected to hazardous mains Indicates a potentially hazardous situation which, if not voltages. Extreme care should be taken to protect against avoided, could result in death or serious injury. shock. Only trained personnel familiar with electronic equipment should install, start, or maintain this equipment. CAUTION WARNING Indicates a potentially hazardous situation which, if not UNINTENDED START.It may also When the frequency converter is connected to AC mains, the be used to alert against unsafe practices.The frequency converter, motor, and any driven equipment must be in operational readiness. Failure to be in operational readiness when the frequency CAUTION converter is connected to AC mains could result in death, Indicates a situation that may result in equipment or serious injury, equipment, or property damage.Unintended Start NOTE When the frequency converter is connected to the AC mains, Indicates highlighted information that should be regarded the motor may be started by means of an external switch, a with attention to avoid mistakes or operate equipment at serial bus command, an input reference signal, or a cleared less than optimal performance.Approvals WARNING DISCHARGE TIME. Frequency converters contain DC link capacitors that can remain charged even when AC mains is disconnected. Robust design and effi cient monitoring make the VLT. AQUA Drive maintenance free. Dedicated to water and wastewater Danfoss Drives unequalled

experience was used to make the VLT. AQUA Drive the perfect match for AC motor driven applications in. RFI filter The IP 20 enclosure has two individually controlled fans for maximum reliability. Only a. Above 90 kW designed with back channel cooling 85% heat dissipated via back channel Advanced cascade controller option Controls up to 8 pumps. VLT quality up to 1.2 MW The VLT AQUA Drive is available from 0.25 kW to 1.2 MW.

Drive experience since 1968 lies behind the clever design of VLT drives. Intelligent cooling High ambient temperatures From 0.25 kW to 90 kW the VLT. AQUA Drive is available in IP 20, IP. The process uses high pressure pumps, which must be carefully controlled. With its builtin PID controller, the VLT. AQUA Drive ensures reliable and precise pressure control, maximising process control and efficiency. Groundwater pumps Submersible deep well pumps need fast start capability, precise control and protection against running dry. The builtin dry run detection and the initial rampup make the VLT AQUA Drive handle such applications to perfection. Wastewater plants Fluctuations in fl. Precise pressure control is required. The builtin pump control makes VLT AQUA Drive a perfect match for irrigation in rural areas. It even offers a special pipe fill function that prevents water hammering and reduces leakage when empty pipes are filled. Distribution Pressure booster pumps with precise pressure control lead to significant reductions in water leakage and energy consumption. Costly and unsightly water towers can be eliminated. Builtin features make. Pipe Fill Mode Enables controlled closed loop filling of pipes. Prevents water hammering, bursting water pipes or blowing off sprinkler heads. The new pipe fill mode is usable in both vertical and horizontal pipe systems. Gain factors for PI are continuously changed to compensate for changing characteristics of the loads. This applies to each PI controller in. In low flow situations, the pump will boost the system pressure and then stop. Monitoring the pressure, the VLT AQUA Drive will restart when the pressure falls below the required level. Dry Pump Protection lowers maintenance costs The VLT. In case of a too low power consumption indicating a no or low flow situation. Motor Alternation This builtin logic controls.
